

	Penetration panel	AQL Screened Room 8 is anechoically lined in accordance with the requirements of DEF STAN 59-41 & 59-411, RTCA DO-160 and MIL STD 461, allowing both very sensitive emissions testing and high power susceptibility testing up to 40GHz. The chamber can be configured with or without various ground plane arrangements offering complete flexibility for our clients individual needs, has removable access ramps and a floor capable of supporting a wide range of vehicles or other heavy equipment. The chamber is fully equipped for both single and three phase 50Hz, 60Hz and 400Hz AC supplies and high current DC supplies and features the common penetration panel arrangements used throughout the facility. As with SR 6, this room is independent and is ideal for secure/sensitive equipment that may require locking away from the main test lab.
